EDUCATION

The Ohio State University, College of Engineering

B.S. in Computer Science and Engineering (AI Specialization), Minor in Mathematics

Columbus, Ohio

Expected May 2027

GPA: 3.82

- Dean's List (all semesters), Trustees Scholarship

- Code4Community, AI Club

- Relevant Coursework: Data Structures and Algorithms, Operating Systems, Artificial Intelligence, Computer Architecture, Web Applications, Linear Algebra, Engineering Statistics, Software Engineering

WORK EXPERIENCE

Software Engineer Intern

June 2026-August 2026

Fidelity Investments

Covington, Kentucky

- Automated a manual internal workflow, cutting processing time by 89% (18 min → 2 min) across ~50 daily runs by engineering and deploying an autonomous AI agent on an internal LLM platform
- Eliminated ~100 lines of redundant code across 2 enterprise application forms by replacing one-off scripts with a unified, config-driven JavaScript engine
- Reduced task completion time by ~25-30% and clicks by one-third for 300+ daily users by redesigning the UI and data model of 2 internal enterprise applications

AI/ML Research Assistant

August 2026-Present

Kumar Lab | The Ohio State University

Columbus, Ohio

- Achieved a preliminary ~21% improvement in rare medical case retrieval accuracy by prototyping a multi-vector retrieval pipeline benchmarked against OGCareBench, using PubMedBERT embeddings and FAISS

Lead Developer

November 2025-Present

Columbus/Central Ohio Colleges Agency (CCOCA)

Columbus, Ohio

- Improving digital outreach and accessibility across Central Ohio through directing a ~20-member development team to deliver full-stack (React, Node.js, SQL) web platforms for 10+ nonprofit clients
- Serve as primary liaison between nonprofit clients and developers, translating client requirements into project scope and coordinating delivery

Software Engineer Intern

May 2024-August 2025

JCL Equipment Co.

Xenia, Ohio

- Boosted database efficiency by 30% by profiling and refactoring SQL queries for faster data retrieval
- Saved 10+ hours per week through a custom Python script that automated manual transaction logging

PROJECTS

GraspIQ | [Demo](#) — Next.js, TypeScript, React, Node.js, PostgreSQL, Docker, Claude API May 2026-September 2026

- Reached 80+ users across Canvas-hosted colleges within 2 weeks of launch by building an AI study assistant integrated with Canvas LMS, featuring 7 specialized AI tools through a Manifest V3 Chrome Extension
- Supported 100+ concurrent AI tool-use sessions by architecting a Dockerized multi-service backend exposing a custom MCP server, verified with Claude Desktop
- Achieved ~90% grounded-answer accuracy across 500+ documents via a retrieval-augmented course Q&A system using OpenAI embeddings and a pgvector-backed PostgreSQL database

JCL Equipment Website | [Demo](#) — HTML/CSS, JavaScript, Node.js, SQL

May 2025-June 2025

- Built and deployed a 30+ page full-stack company website using HTML, CSS, and JavaScript, increasing online engagement by 40%
- Devised a self-service content management tool enabling non-technical staff to update site inventory via a Node.js and SQL backend

SKILLS

Languages | Python, JavaScript, TypeScript, Java, C, C++, C#, SQL, Go, HTML/CSS, Assembly

Frameworks, Tools & Cloud | React, Node.js, Express.js, Docker, GitHub, Git, REST APIs, AWS, PostgreSQL

ML/AI & Data Tools | Claude API, RAG, FAISS, pgvector, PyTorch, Scikit-learn, OpenCV, Pandas
